Los Países del Mundo

Overview:

Explore the world in Spanish, learning the locations and Spanish names for 60 countries along with 21 Spanish-speaking nations.

Assembling the game:

Print as many copies of pages 3 to 7 as needed to allow each player to have a single playing board. For **2 to 7 players**, print 1 copy of pages 8 to 13. For **8 to 10 players**, print 1 copy of pages 8 to 11, 2 copies of page 12, and 3 copies of page 13. For **11 to 18 players**, print 2 copies of pages 8 to 11, 3 copies of page 12, and 4 copies of page 13. Cut all copies of pages 8 to 13 into playing cards and shuffle well. Print 1 copy of pages 14 to 17 for reference, if desired. (See *Game Assembly Tips*, pages 18 & 19, for ideas on making games durable.)

Playing the game: **Los Países del Mundo**

1. Let each player choose a playing board, or simply pass out boards.
2. Shuffle the deck well and distribute 10 cards to each player.
3. Place the remaining cards face-down in a scattered pile between players.
4. Each player first looks at the cards they have and tries to fit these onto their playing board. Each board has spaces for six cards at the top and 3 cards at the bottom. Only cards with their continent name may be placed in the top 6 spaces, and only cards with “¡Hablamos Español!” may be placed in the bottom 3 spaces. All other cards should be kept off the playing board, ready to trade in.
5. On each turn, players return one card (any card not needed to fill their playing board) face-down within the pile. They may then choose any one card (without peeking!) from the pile and try to fit it onto their playing board.
6. Whenever they find a new card to fit onto their board, players should be encouraged to locate that country on the map from page 14.
7. The winner is the first to fill all 9 spaces on their board (they will have one extra card left over).

Play variations:

- Use the map on page 14 to introduce the names and locations of Spanish-speaking countries and other place names before playing the game.
- For a longer game with only a few players, have each player try to collect all 12 countries from a single continent.
- Use the cards like flash cards for practice pronouncing and locating each nation. Make new cards for countries not present, if desired.

Game Assembly Tips

File Folder Games

File folders can be purchased in any store that sells office supplies. Plain manila folders can be used, or choose colored folders for variety. Avoid the expandable types and those with a pocket for floppy disks.

Trim the main pages of the game if needed and test how they will be placed, aligning both pages near, but not covering, the center fold.

It is highly recommended that you use **rubber cement** to glue the pages in place, as it is easy to apply and dries without wrinkling the paper. Extra smears around the edges can easily be rolled off by rubbing your finger over them. Rubber cement typically comes in a brown glass bottle and is found near other glues at most stores that sell office supplies.

For durability, the inside surface of file folder games can be covered with **clear contact paper**. Cut two pieces roughly the size of the halves of the folder and apply separately, leaving a small gap over the center fold. Trim the extras around the edges to fit the folder neatly.

Clear contact paper comes in a roll and is usually found within a display of an assortment of printed contact papers, used to line shelves. These can be found at most stores that sell houseware items and generally costs about \$6 for a 18" by 24' roll - enough to protect about a dozen games.

Most **game pieces** can be kept handy, stored right with the folder. Simply seal a long mailing envelope and cut an inch or so off the top, making an elongated pocket. Put the game pieces in the pocket, fold the top over a couple times, and use a paper clip to attach the top of the envelope to the top of one of the inside surfaces of the file folder.

NOTE: These tips will help the game last and keep game pieces handy. If you are short on time, most file folder games can be played after simply printing the pages and cutting out any game pieces.

Game Assembly Tips

Cards & Game Pieces

If possible, print cards and game pieces on **medium card stock**, which usually comes packaged like other printer papers but is thicker and stronger. Card stock can be found in most office supply stores near other specialty papers. The price per package is slightly higher than average copy paper but varies with the brand, surface finish, and seller. Card stock of up to 65 or 67 lb. weight (thickness) can be used with most printers.

Cards and game pieces can also be covered with **clear contact paper** for extra durability. Before cutting the printed sheet, cover one or both sides with the contact paper and then cut out the pieces just as you normally would. Sharp corners can be snipped off or corners rounded for added appeal and safety. See the previous page for details on clear contact paper.

Spinners

Print and protect both pieces of a spinner just as you would for cards and game pieces, above. It is recommended that you only cover the one printed side of these pieces, to make it easier to punch a hole through them. Once the two pieces are ready, put a **metal brad** through the holes and open the “legs” out flat against the back of the spinner. If the arrow will not spin properly, adjust the fit of the brad until it is either more or less snug against the spinner surface. Metal brads can be found in a little plastic package among displays of other small office supplies such as erasers, pencil leads, and labels.
